#### Summary

Results-oriented Backend Developer with strong experience in Node.js, database design, and scalable API architecture. Demonstrated ability to improve backend performance and collaborate effectively in Agile teams. Known for strong problem-solving, adaptability, and communication skills, with a passion for writing clean, maintainable code.

## **Technical Skills**

Programming Languages: JavaScript (Node.js), Python, C++, SQL, NoSQL

Frameworks: Express.js

Tools & Databases: Git, Docker, MongoDB

Other Skills: API Design, ORM (Sequelize, Mongoose), Unit Testing (Jest), Agile Development

Software Development Fundamentals (ITI): OOP, Data Structures, Algorithms, Clean Code, Design Patterns

Soft Skills: Communication, Adaptability, Critical Thinking, Collaboration, Attention to Detail

#### Projects

Courses API	June 2024 – Aug 2024
Backend Developer	Node. js, MongoDB, NoSQL
Built a RESTful API to manage over 1,000+ course documents with secure user roles and acce	ess
Optimized MongoDB queries to reduce data retrieval time by $30\%$	
Implemented authentication, registration, and course tracking for $300+$ test users	
Vidly Project	Jan 2024 – May 2024
Backend Developer	$Node. js, \ MongoDB$
Developed REST APIs for a video rental system handling $500+$ customers and $200+$ movie en	tries
Implemented data validation and error handling to improve backend reliability by $25\%$	
Refactored code for modular structure, improving maintainability and reducing technical debt	
Virtual Surgery System	July 2022 – July 2023
Graduation Project	VR, Haptic Feedback, Java
Developed a VR Surgery Simulation System for educational training in medical procedures	
Integrated haptic feedback and 3D rendering to simulate real surgical tools	
Provided a realistic, interactive, and safe training environment for medical students	

### Experience

Software Development Intern Orange Digital Center Egypt	Aug 2023 Cairo, Egypt
Built a university management system used by 100+ test users for course registration and grading	
Designed and implemented 3 core modules using OOP and MVC architecture in C++	
Wrote $30+$ unit tests with Google Test, reducing bugs in QA by $40\%$	

#### Education

Menofia University B.Sc. in Computer Science

Information Technology Institute (ITI) – Intake 46 Software Development Fundamentals Track Egypt Sept 2019 - July 2023

Egypt Feb 2025 – June 2025
